

User Manual

iPixel Bar 1815

Check that the unit has not been damaged during transport

Read all cautions and warnings
prior to operation of this
equipment

Protection Against Fire

Fire

1. Maintain a minimum of 1 50cm distance from any type of flame
2. Replace fuse only with the specified type and rating
3. Do not install the unit to close a heat source
4. Make sure cable are properly secured away from unit movement
5. Maximum surface operating temperature 80°

Protection Against Electrical

Electrical

1. Disconnect power before servicing
2. The unit must be earthed (electronically grounded)

Protection Against Mechanical Hazards

Mechanical

1. Use safety chain when hanging unit
2. Use quality clamps or bolts when positioning unit
3. Do not open unit while it is on, risk of electrical shock

Technical Information

- Light Source: TX high power 15W RGBWAUV LED X18pcs
- Average Lifetime: 100,000 Hour
- Input Voltage: 100-240VAC, 50/60Hz
- Power Consumption: 280W max
- Lens angle: 15° /25° ,optional
- Display: LED display
- DMX Channel: 8/11/41/113 CH
- Dimmer; 0-100% linear dimming system
- Refresh rate: 4.7kHz
- Control Mode: DMX 512 control, Stand-Alone, Sound Control.
- Connector: True-One system with Power&dmx In+Out;
- Construction: Die-casting aluminum housing; Black/Silver/White color optional
- IP rating: IP65
- Net Weight: 10.5kg
- Dimension: 992×87.5×183.5mm

Main Power Connection

Caution!

1. Do not connect fixture to a dimmer system.
2. This unit has Auto switching power supply. It will respond to 110V or 220V automatically
3. This unit must be earthed. (Electronically grounded)
4. Replace fuse only with the specified type and rating.

The occupation of the connection-cable is as follows:

This fixture is equipped with an electronic power supply that will let the unit operate from 90V to 240V from 50Hz to 60Hz.

Cable (USA)	Cable (EU)	Pin	110V	220V
Black	Brown	Live	L	L
White	Light Blue	Neutral	N	N
Green	Yellow/Green	Ground		

110V
Connection

220V
Connection

DMX-512 Connection

The fixture is equipped with 3 pin XLR Sockets for DMX input and output. The sockets are wired in parallel. Only use a shielded twisted pair cable designed for RS-485 and 3 pin XLR plugs and connectors in order to connect the controller with the fixture or the fixture with another.

DMX—input

1. Shield
2. Signal (-)
3. Signal (+)

DMX—output

MENU Map

CH 8/11/41/113	DMX ADD	Red	Green	Blue	White
Amber	UV	Program	Speed	Auto/Sound	Display Invert

CHANNEL MODE This function allows you to select channel mode 8CH/11CH/41CH/113CH. Press UP/DOWN to set desired mode, press ENTER to confirm setting.

ADD SETTING This function allows you to set desired dmx address on fixtures. Press UP/DOWN to get value, press ENTER to confirm setting.

RED INTENSITY This function allows you to dim red color intensity from 0 to 100%. Press UP/DOWN to get value, press ENTER to confirm setting.

GREEN INTENSITY This function allows you to dim green color intensity from 0 to 100%. Press UP/DOWN to get value, press ENTER to confirm setting.

BLUE INTENSITY This function allows you to dim blue color intensity from 0 to 100%. Press UP/DOWN to get value, press ENTER to confirm setting.

WHITE INTENSITY This function allows you to dim white color intensity from 0 to 100%. Press UP/DOWN to get value, press ENTER to confirm setting.

AMBER INTENSITY This function allows you to dim amber color intensity from 0 to 100%. Press UP/DOWN to get value, press ENTER to confirm setting.

UV INTENSITY This function allows you to dim uv color intensity from 0 to 100%. Press UP/DOWN to get value, press ENTER to confirm setting.

PROGRAM This function issues 30 kinds built-in programs, Press UP/DOWN to select desired effect from Pr01 to Pr30, Press ENTER to confirm setting.

SPEED This function allows you to control speed of built-in programs from SP01 to SP16. Press Enter to confirm setting

AUTO/SPEED This function allow you to set fixtures be stand-alone mode and sound mode. Press Enter to confirm setting.

DISPLAY This function allows you to invert display manually. Press Enter to confirm setting.

Cleaning!

Due to fog residue, smoke, and dust cleaning the internal and external optical lenses must be carried out periodically to optimize light output.

1. Use normal glass cleaner and a soft cloth to wipe off the outside casing.
2. Clean the external optics with glass cleaner and a soft cloth every 20 days.
3. Always be sure to dry all parts completely before plugging the unit back in.

Cleaning frequency depends on the environment in which the unit operates (i.e. smoke, fog residue, dust, dew).

Unit not responding to DMX:

Check that the DMX cables are connected properly and are wired correctly (pin 3 is “hot”; on some other DMX devices pin 5 may be “hot”). Also, check that all cables are connected to the right connectors; it does matter which way the inputs and outputs are connected.
